Address: Villefranche-sur-Saône, France
Portfolio: <https://fareskouki.com>

Full-Stack Developer with 3+ years of experience building high-traffic web applications. Specialized in scalable architectures, performance optimization, and cloud service integration (AWS / GCP / Vercel). Significant experience with Stripe, Sanity, GAM, and WebGL (ThreeJS).

EXPERIENCE

Sheep Esports — Lead Developer / Full Stack – 04/2024 – 11/2025

- Created, optimized, and maintained a website exceeding 600,000 monthly users using Next.js / Sanity.
- Implemented a scalable microservices-based architecture to improve user engagement in esports.
- Ongoing corrective and evolutive maintenance over 18 months, with automated testing and code reviews.

MiHotel — Software Engineer (Freelance) – 08/2024 – 09/2024

- Developed a website with Nuxt.js.
- Integrated Stripe for payments, ensuring a seamless and reliable customer experience.

NOUS – Ouvert, Utile et Simple — Web Developer (Apprenticeship) – 09/2022 – 11/2023

- Integrated and developed multiple websites for various clients at a digital agency.
- Built 4-5 websites using ReactJS and VueJS.
- Managed 2 user management systems in Python and Symfony.
